

I think XM is the best way to receive music, communication and information, Nation wide. It should not be affected by any organizations. We the users are the ones that are paying for a service. A service which I consider is perfect! I even think XM should try more different ideas of communicating additional information which is and could always be useful to us listeners. XM is the best way to receive radio. I even encourage them to even try to incorporate video in their communication with us the users. We as a trucking company always benefit from weather conditions through the XM radio information broadcast.
